

# Wind is powering Oklahoma's schools.

Don't take our word for it. Take theirs.

## SEILING PUBLIC SCHOOLS SUPERINTENDENT RANDY SEIFRIED

"In small communities like this, the school district is very important in making this community stay progressive. The wind farm has actually made the building project we have going on right now possible."

Seiling Public Schools passed a 16-year, \$28 million bond initiative to build a new, K-12 school building. With the wind industry, Seiling is no longer on the State Formula Aid List and receives no State Salary Incentive.

## DEWEY COUNTY COMMISSIONER DILLON BERRY

"We've never really had a consistent industry and so when you bring in an industry like the wind farm, that is paying upwards of \$6 million into a County this size, it's an impact like we've never seen before."

The Wind Industry is the **#1 TAXPAYER** in Dewey County and in the school districts of Seiling, Taloga and Thomas/Fay/Custer.

## CHUCK COFFEY, DOUBLE C CATTLE CO

"We're all about living in a local community and to know that some of these dollars are going to go the Murray County School Districts gives me a sense of pride."

The Wind Industry is the **#1 TAXPAYER** for Davis Public Schools

## GRADY COUNTY COMMISSIONER RALPH BEARD

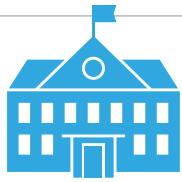

"We tried to pass a bond issue four different times to get a middle school built and we fully believe that it was because of the wind turbines we have here, that it finally passed and we started a new middle school."

The Wind Industry is **#1 TAXPAYER** in the school districts of Rush Springs, Minco, and Stephens/Bray

# These schools are doing great.

The growth of the Wind Industry in a stagnant, rural economy means these schools are not only growing, *but they are flourishing.*

Of the 62 school districts containing wind energy projects, 32 of those districts receive **no state foundation aid**. Additionally, 21 of those districts receive no state foundation aid **nor do they receive** any state salary incentive support.

**191 schools** receive **4 MILS** in 26 counties

**62 SCHOOLS** receive **long-term revenue** they can **COUNT** on and **BUILD** on

**#1 WIND IS TAXPAYER** in 41 school districts

**32** school districts require **NO State Foundation Aid**

**21** school districts require **NO State Salary Incentive Support**

## Think of their future.

Stable, consistent ad valorem revenue from the Wind Industry for the next 25 years means schools are bonding projects and becoming self-sustaining.

### 25 YEAR TOTAL

Existing projects AND prospective projects currently in development  
Total **\$1.36 billion dollars** paid to the counties in ad valorem revenue

**\$1 billion** paid by wind industry | **73.26%**  
**\$365 million** paid by OTC reimbursement | **26.74%**
